

VICTOR GIRLA

PRODUCT DESIGNER

@ vicugirla@gmail.com

+44 7429326050

Winchester, UK

Senior Product Designer with 10+ years of experience leading end-to-end product design for SaaS, fintech, enterprise, e-commerce and mobile products across web, iOS and Android. Repeatedly joined companies as a founding or lead designer, establishing UX practices, design systems and scalable product experiences from discovery through launch.

Delivered products across fintech, banking, enterprise software, travel retail, telecom and consumer applications, including platforms serving millions of users and mobile apps exceeding 10 million downloads. Strong expertise in product strategy, user research, design systems and cross-functional collaboration, translating complex problems into intuitive products that drive business impact.

Work History

Product Designer at IBM in Hursley, UK

March 2024 - Current

- Led the end-to-end design and delivery of a major capability for IBM's event-driven integration platform, enabling AI agent and partner use cases powered by real-time event streams.
- Worked across multiple platform capabilities to align user needs, technical constraints and product strategy, acting as a design catalyst for cross-functional delivery.
- Reduced large-scale complexity for users adopting event-driven integrations through progressive disclosure and guided workflows. Helping users identify and manage event sources more efficiently within complex environments.
- Simplified highly technical workflows into scalable enterprise UX patterns, reducing cognitive load and improving discoverability across data-intensive interfaces.
- Driving end-to-end design from discovery through delivery for AI-powered enterprise workflows and event management experiences.
- Partnered with product management and engineering teams to shape feature direction, validate solutions and deliver customer-focused enterprise capabilities using IBM Enterprise Design Thinking.

Skills: Enterprise UX, SaaS, Product Design, Design Thinking, Data Visualisation, AI Systems,

Lead Product Designer at Flyfish in Paphos, Cyprus

May 2023 - December 2023

- Joined as the founding Product Designer to establish the UX function for a fintech banking platform across SaaS and mobile.
- Led end-to-end product design from discovery, research and product strategy through UX, UI, prototyping and delivery.
- Defined the experience architecture for business banking, including onboarding, KYC, payments, multi-currency accounts, business cards, payroll and salary management.
- Created the company's design system, component library and scalable interaction patterns to accelerate product development.
- Established collaborative product design processes across founders, product, engineering and business stakeholders.
- Successfully launched the MVP, enabling the business to enter the market with a scalable product foundation.

Skills: Product Design, Fintech, Banking Platforms, Role-Based Systems, Cross-collaboration, Product Strategy, Web, Mobile & SaaS UX

Lead Product Designer at Inflyter in London, UK

May 2020 - April 2023

- Joined as the founding Product Designer, defining the product vision and leading end-to-end design across B2C mobile apps, B2B operational platforms and web experiences for a global travel retail ecosystem.
- Established the company's UX practice, design system and scalable design processes, creating consistency across products and accelerating delivery.
- Designed innovative retail experiences for airport duty-free shopping, including mobile applications, web platforms, smart lockers and automated vending solutions deployed across 10+ international locations.
- Partnered closely with founders, stakeholders and engineering teams to translate business objectives into customer-centred product experiences and successfully launch products to market.
- Led product discovery through user research, analytics, usability testing and experimentation, using customer insights to improve user journeys, conversion and engagement.
- Contributed to securing more than £1.7M in funding by shaping the product vision, customer experience strategy and platform direction.
- Delivered scalable products adopted across 12+ international airports and multiple global retail partners.

Skills: E-commerce, Retail and Travel, Product Strategy, Design Systems, Web & Mobile Apps, B2B/B2C Platforms

Lead Product Designer at Oakam Ltd in London, UK

June 2019 - May 2020

- Led product design for fintech lending products across web and mobile platforms.
- Owned the complete product design lifecycle from discovery and research through delivery and optimisation.
- Redesigned customer borrowing journeys to improve usability, accessibility and conversion across key financial experiences.
- Introduced scalable UX and UI standards that improved consistency across the product ecosystem.
- Partnered closely with product managers, engineering teams and business stakeholders to align customer needs with commercial objectives.
- Established stronger design collaboration practices, helping integrate UX into product decision-making.

Skills: Fintech, Product Discovery, User Research, Usability Testing, Mobile UX Design, Interaction Design, Cross-platform Design (iOS/Android/Web), Wireframing & Prototyping, Stakeholder Collaboration, Agile Product Delivery

Product Designer at Be Sport in Paris, France

1 November 2018 - June 2019

- Led design of a sports social networking platform enabling athletes and fans to share, follow, and engage within a connected community.
- Designed end-to-end user journeys and interaction flows informed by live user testing, research, and continuous feedback loops.
- Conducted user research, usability testing and behavioural analysis to identify engagement opportunities and inform product prioritisation.
- Collaborated closely with product managers, engineers, and designers to take features from concept through to production.
- Collaborated with product leadership to shape roadmap priorities and improve user engagement across key platform experiences.
- Delivered high-quality, user-centred interfaces focused on clarity, usability, and visual consistency across the platform.

Skills: Product Design, UX Research, User Testing, Interaction Design, Social Platforms, Cross-functional Collaboration, Product Delivery

UI/UX Designer at Vectone Mobile in London, UK

January 2018 - September 2018

- Designed end-to-end mobile experiences for VoIP and communication products across iOS and Android.
- Created user flows, interaction patterns and high-fidelity interfaces supporting key communication journeys.
- Collaborated with engineering teams to deliver production-ready mobile experiences.
- Improved usability through iterative design and customer-centred problem-solving.

Skills: Interaction Design, Mobile VoIP Applications, User Flows, UI Design, UX Design

UI/UX Designer & Manager at Softintercom in Chisinau, Moldova
November 2013 - November 2017

- Delivered large-scale consumer products, including an Editor's Choice mobile app with 10M+ downloads and 250k active users.
- Led end-to-end design delivery across multiple iOS/Android consumer applications from concept through launch.
- Built and scaled a design team; introduced structured design processes, workflows, and delivery practices.
- Defined UX/UI standards and core interaction patterns, improving consistency across the product portfolio.
- Partnered closely with product and engineering teams to ship production-ready mobile experiences at scale.
- Mentored designers and established design review practices to improve quality, consistency and collaboration across teams.

Skills: Product Ownership, Mobile App Design, UX/UI Design, Team Leadership, Fitness and Consumer Products, Cross-functional Delivery.
